In 1949, Ludovico Mares designed and manufactured his first masks and spearguns with one purpose in mind: to share his extreme passion for the sea and diving with the rest of the world. At the beginning, Mares was just a small factory in Rapallo; today, more than 68 years later, the Italian based company dominates the scuba diving world with leading design and technology. Over the past six decades, Mares has come a long way by achieving new goals and taking diving to new extreme heights and depths. Mares represents only the best in dive products.

Over the past 68 years, Mares has become the worldwide leader in manufacturing and distribution of state-of-the-art diving equipment and is continually setting new industry standards. Constant investment in innovation and continuous advanced research combined with the expertise of our staff makes Mares the leader in the production of safe and reliable underwater equipment. The best of Mares is combined in every product to meet the needs of each and every diver.

Our mission is to ensure you

**ENJOY DIVING WITH ADVANCED PERFORMANCE THROUGH SUPERIOR TECHNOLOGY.**

We invite you to take a trip through our catalogue, and plunge into the world of Mares. You will find a collection of fantastic new products with superior technology and extreme emotion at the core.

Without our love and undisputed passion for the sea, our brand would not be what it is today. There is a sense of emotion and dedication rooted from our legendary founder that is felt at an extreme level by everyone at Mares. Even though we use state-of-the-art machinery and the most sophisticated electronic equipment, the core of our business and the spark that makes it all happen is still the same today as it was 68 years ago: passion.

Would Ludovico Mares ever have imagined that over the course of 68 years his small factory in Rapallo would become the worldwide leader in the production and distribution of diving equipment? Mares was founded in 1949 by former Istrian diver Ludovico Mares, who served in the Austrian Navy during World War I. Mares quickly became a small industrial company with a continuous increase in sales and never an absence of ideas for new and improved products. As the passion for diving grew around the world in the late '60s, the company expanded into the European diving and snorkeling market. Between 1978 and 1982, Mares earned an undisputed place as the global market leader in fins: today nearly all diving and snorkeling fins are produced using plastic materials, according to the manufacturing process invented by Mares. The company also rose quickly to the top of the regulator market, becoming an uncontested leader as well. Today, Mares has a presence in over 80 countries around the world and is internationally recognized as the leading company in the manufacturing of diving products featuring only the best in cutting edge technology.

Every solution Mares offers represents the forefront of today’s technology and is the result of the best in Italian design. A complete passion for the sea and an all-encompassing vocation implanted in the history of its legendary founder is felt at a continuous powerful level by everyone on the Mares staff. Mares has always been the best the diving industry has to offer. We will continue striving towards greater design and innovative technology.

Mares has proven its superior excellence in all waters with the 2016 collection. Over the past 68 years Mares has developed a total of four different brands to meet the needs of every person with a passion for watersports. Our well known line for enthusiastic scuba divers, the Pure Instinct line for demanding freedivers and spearfishermen, the Mares rental line for Dive Centers, and our Aquazone line for those who enjoy swimming and snorkeling. As we progress towards the future, we will continue our research and design for new products to meet the needs and desires of all those who have a passion for the sea.

Above, clockwise from left - 1. Adjustable, pre-mounted elastic suspenders help to secure the suit from unwanted movement. 2. New exclusive dedicated purge and inflation valve. 3. Kevlar protection has been applied to all the hard-wearing areas such as the shoulders, knees, shins and bottom. 4 & 5. Si-Tec Silicone seals to the wrist and neck ensure are able to be replaced immediately by the user, greatly reducing the need for the suit to be sent away for lengthy and expensive servicing. 6. Dry seal around neck with special drainage system prevents water exposure. 7. Roomy zippered pocket features two separate sections, both with the highest quality YKK zipper and piping around the pocket flap for better grip, even whilst wearing thick gloves.
ACTIVE HEATING VEST

- DOUBLE ZIPPER FOR COMFORT WHEN SEATED
- SUPPLIED WITH RECHARGEABLE BATTERY AND CHARGER
- ADJUSTABLE HEAT SETTINGS TEMPERATURE CONTROL
- 2-5 HOURS HEATING TIME (STANDARD GARMENT)
- HAND WASHABLE
- CREATED TO BE EVEN LIGHTER AND THINNER FOR DEMANDING DIVERS
- PROVIDES HEAT TO THE BACK KIDNEY AREA AND TO EACH SIDE OF THE CHEST IN ORDER TO GIVE A FEELING OF COMPLETE WARMTH TO THE UPPER BODY

*THE ACTIVE HEATING VEST IS NOT SUITABLE FOR PEOPLE WITH PACEMAKERS

TECHNICAL FEATURES

- CHARGE LEVEL AND BATTERY LEVEL INDICATOR
- 2 TYPES OF BATTERIES (UP TO 10 HOURS HEATING TIME), 4 WARMTH SETTING
- EU CHARGER

Details

- Air Tank Module included
- USB interface included
- At-a-glance tank pressure information
- Downloadable maps (from PC only)

RRP: $1599.00
In night mode the information is provided by white numbers on a black background. In presence of decompression the middle row features orange instead of white numbers.

The profile view in night mode features a blue over black design. Upon entering decompression, the no deco time in the top right corner is replaced by the total ascent time, viewed in orange instead of white.

In bottom timer mode the display changes format showing current max and average depth, stopwatch, dive time, temperature, tank pressure, and time to reserve (TTR) all on the same screen. The colour layout is white over black.

During a deco dive you can call up a table listing each individual deep and deco stop.

The post dive screen summarizes the main parameters of the dive just completed, in addition to showing your remaining desaturation time, no fly time, current CNS level, surface interval and the supersaturation in each tissue.

The logbook features three pages of information for each dive, including depth, temperature and tank pressure profile.

The underwater menu can be called up at any time during the dive, allowing for editing of many of the Icon HD’s settings, including the choice of linked map.

The tissue saturation graph provides a plethora of information regarding your decompression status and how your current depth affects it.

Warnings alert you when remaining at the current depth might cause a higher than expected increase in total decompression time, as might be the case when control of the decompression calculation switches to a slower tissue.

### HEIGHT - CHEST - WAIST - HIPS: cm / inch, WEIGHT: Kg / lb
The new Diving Center Program of Mares is a revolution within itself. For the first time in dive history, Mares has developed a line dedicated towards diving centers and rental locations. We believe that using rental equipment should never hinder one’s enjoyment of the seas. Therefore, we have developed a line of equipment that is comfortable and flexible so that the equipment will feel like yours, as opposed to rental gear. The dive center needs to handle and adjust the equipment in the shortest period of time, to make sure that you can spend maximum time exploring the underwater world instead of waiting for your equipment to be fixed. The “Colour-and-Size” identification system, the various detailed solutions to adjust, and fit your dive gear to your needs, are just few examples of many carefully developed solutions to make your dive experience with the new Mares DC line as unique as your wishes are.

Mares firmly believes in the importance of providing detailed information on the Internet. As a result, we’ve made a commitment to continuously update our website and integrate this into our culture. In addition to our well-known website www.mares.com, we now have a highly active Facebook Mares Just Add Water page and YouTube channel, that is continuously updated with media rich images, videos, news, and global events.

We feel it is vital to connect, listen, and engage directly with you and your valuable contributions. We are thrilled to have the opportunity via different mediums to communicate directly with you. Delivering product information, producing technical videos, Facebook, YouTube, and updating our website are all ways we can stay connected. It is this collaboration that will stimulate new ideas, and research, as we continue our pursuit of creative and innovative products. Mares invites you to join our community and share your passion with us.
